

ANIHEATER®

The new generation of heating lamps

UNITED STATES PATENT

WHY USE ANIHEATER®

A great product exceeds expectations

100%
MAINTENANCE
FREE

Advantages of Aniheater®

- **Reducing energy**

Reducing energy consumption in the stables by up to 50% when combined with dual control

- **Even distribution of heat**

Providing more even distribution of heat than traditional heat lamps. This ensures better food intake and higher survival rates among piglets as well as reduces the use of medicine.

- **Waterproof IPX9K Approved**

Being easy to clean and maintain. To clean the Aniheater®, you simply use a high pressure cleaner, which means you do not have to remove it. This also helps maintain a high hygiene level.

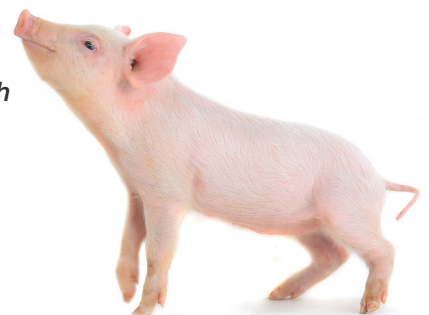

- **Long lifetime**

Aniheater® does not use incandescent light bulbs like traditional heat lamps. 1 year warranty.

- **Low fire risk:**

Aniheater® work at a lower temperature than traditional heat lamps which reduces the risk of fire.

100%
WATERPROOF

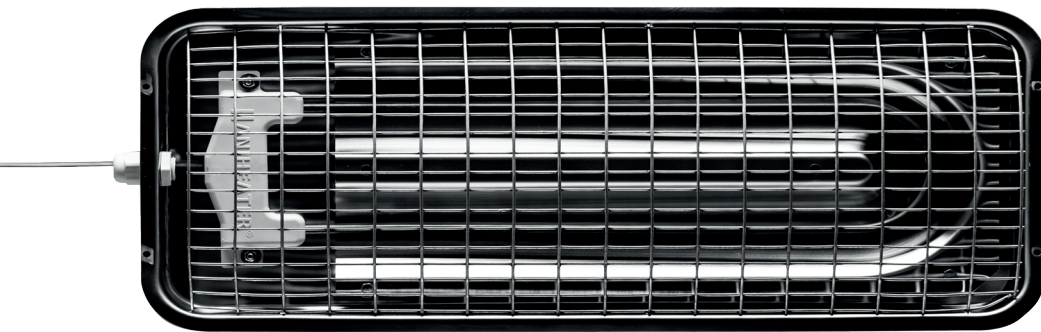

PRODUCTS

Aniheater® comes in 2 variants
100 w and 150 w

100w / 150w

Incl. 240 cm cable

72,0 °C Lamp base
23,6 °C Left side from the lamp

58,5 °C Above the heating element
46,2 °C Left part above Aniheater®
26,0 °C Next to Aniheater®, front

41,8 °C Floor under the lamp
28,8 °C The right side from the lamp
39,3 °C Under the lamp/ lid

38,5 °C Floor under Aniheater®, middle
35,2 °C Floor under Aniheater®, right side
33,0 °C Floor under Aniheater®, leftside

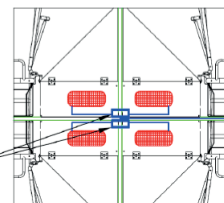

RECOMMENDATION 1

This installation is the most popular, and it has been set up at Moutrup A/S, by Christoffer Hensberg

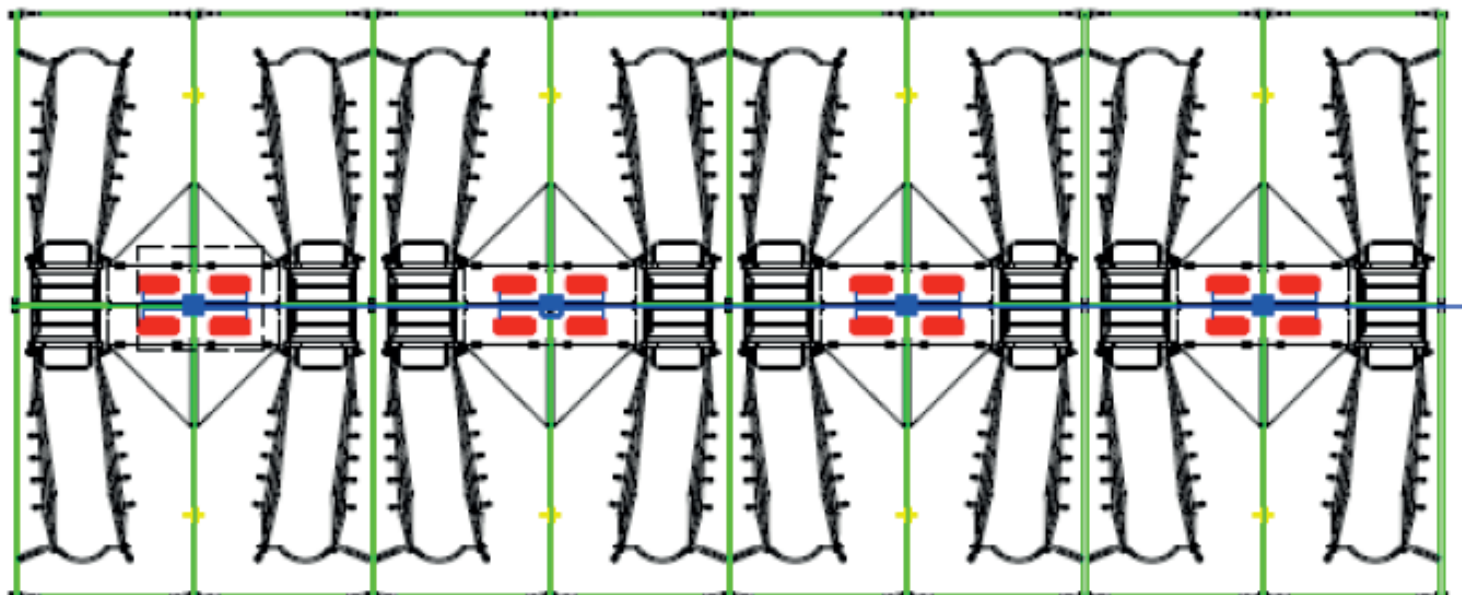

"Future Farming, is a trustworthy company that keeps what they promise."

Christoffer Hensberg - Moutrup A/S

Dual Controller

Installation of 16 Aniheater® with 8 Dual Controllers.

- Dual control for two Aniheater®
- Possible to adjust half/full amount of Watt at each device

”

We have chosen to install Aniheater® in our new stable. We have a total of 740 Aniheater® fitted with the Dual Controller. We have been extremely pleased with the cooperation we have had with Future Farming, it is a trustworthy company that keeps what they promise. We are very pleased with the Aniheater®, they provide a good heat distribution in the cave and the Dual Controller ensures that we can adjust the heat according to the needs of the pig. Durability is very high, we clean them with high pressure cleaners and it has not caused any problems.

Christoffer Hensberg - Moutrup A/S

RECOMMENDATION 2

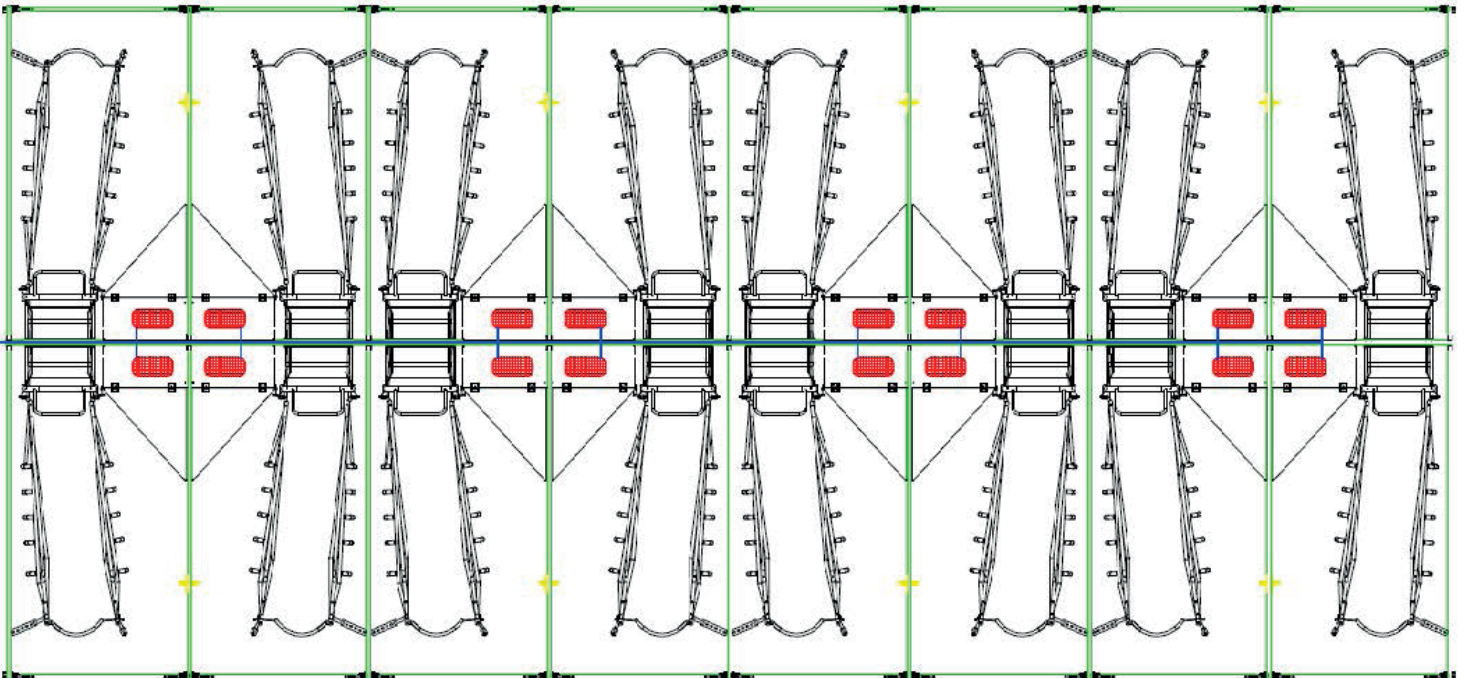

An example of how Jonas Juhl from Grøndal has done in his stable

"We have switched to Aniheater® in all our stables"

Jonas Juhl - Grøndal

Multi Controller A16

Installation of 16 Aniheater® with one Multi Controller A16.

- Possibility to control half / full power on up to 16 Aniheater® at the same time

”

We put the first Aniheater® up in our stable in 2013, and since then we have switched to Aniheater® in all our stables. Of all the Aniheater® we've set up over time, every single one still works today. Cleaning the Aniheater® works with the high pressure cleaner during the washing of the stables. We are extremely pleased with our choice for Aniheater®

Jonas Juhl - Grøndal
